PROJECTS

Unity Slot Machine Prototype Developed a working slot machine game using Unity and C#, integrating animations with DOTween, reel logic, paytable math, and hardware devices. Built a .NET backend system to manage real-time communication with bill validators and ticket printers, enabling full gameplay, cashout flow, and payout validation in a physical cabinet environment. <https://kordellschrock.itch.io/slot-game-howling-wolf>

EDUCATION

Gaming Innovation Course (Slot Design), University of Nevada, Las Vegas (UNLV) 2024

Bachelor of Computer Science with Minor in Data Science, Iowa State University (ISU) 2018 - 2023

SKILLS / CERTIFICATES

Unity Certificate	Unity Junior Programmer Pathway, 2025
Unity	(C# scripting, prefabs, animation controllers, ScriptableObjects)
Slot game mechanics	(RNG logic, reel strips, paytables, bonus features)
C#/.NET backend	async/await, multithreading, NamedPipes, serial I/O
Hardware integration	(JCM bill validators, ticket printers, COM Ports/USB devices)
Programming Languages	C#, Java, Python, SQL, Javascript, HTML
Build & Deployment Tools	Git, CI/CD, JSON, REST APIs, Node JS, React, Unity build pipelines
Soft Skills	Strong debugging, problem-solving across hardware + software

EXPERIENCE

I.T. Oct 2023 - Current
Meskwaki Nation *Tama, IA*

- Equipment procurement with an annual IT budget of \$250K.
- Supporting over 600 devices and eight core switch closets and 2 main server closets.
- Led cross-department IT initiatives, managing timelines, vendor relationships, and technical deployment from planning through implementation.

Intern Testing Engineer May 2023 - Aug 2023
BMM Test Labs *Las Vegas, NV*

- Testing Engineer collaborated on the certification of Class II and III slot machines across multiple jurisdictions.
- Tested platforms, SAS, meters, RNG math models, and hardware components including bill validators and ticket printers.
- Gained hands-on experience with regulatory processes for technical compliance.

Intern Software Engineer May 2022 - Aug 2022
Workday *Boulder, CO*

- Developed Python scripts to analyze and link related Jira tickets, enabling faster issue resolution and improving workflow efficiency for Data Analysts.
- Completed three data science projects leveraging Workday's Jira data to enhance system insights.
- Software Development Engineer Intern focused on data reliability and automation.
